# INTRODUCTION

## HISTORY OF HTML

### HTML stands for Hyper Text Markup Language.

- It is used to share the information over the internet.
- HTML is developed by Tim Berners' Lee in 1991. But officially released in 1993.
- The first version of HTML consists of 18 tags.
- Html follows certain rules and regulations setup by “**ISO**”.
- International Organization for Standardization is a set of rules and regulations are present in an ‘**SGML**’ document.

### Versions of HTML

- **HTML – 1** version in the year 1993.
- **HTML – 2**, version in the year 1995.
- **HTML – 3.02**, version in the year 1997.
- **HTML – 4.1**, version in the year 1999.
- **HTML – 5**, version in the year 2014.

### Features of HTML

- It is easy to learn.
- It is a tag based language.
- HTML is supported by multiple browsers.
- First web browser is Netscape navigator which was developed by the Mosaic.
- It is a portable language.
- **WORA** stands for ‘write once run anywhere’.

### Limitations of HTML

- HTML has less designing capabilities.
- It is dependent on other technology such as CSS in order to develop well designed web pages.
- HTML has no programming capabilities.

- Using HTML and CSS we can develop only static webpage.
- In order to write the HTML code requires an editor such as VS Code, Notepad, Eclipse.
- In order to execute the HTML code we require web browser like Chrome, Firefox, Edge, Opera and Safari.

## **CSS**

- **CSS** stands for Cascading Style Sheets.
- It was developed by W3C to add styling to the HTML elements.
- W3C stands for World Wide Consortium.

## **Versions of CSS**

- **CSS-1** (level-1) in the year 1996.
- **CSS-2** (level-2) in the year 1998.
- **CSS-3** (level-3) in the year 1999.

## **Why do we require CSS?**

- Since HTML has less designing capabilities we cannot create well designed or most appealing websites.
- Using HTML we cannot add style, animation and transitions to the webpage.
- Therefore we require CSS to create well designed webpages.

## **Advantages of CSS**

- It allows us to add style, animation and various effects to the webpage.
- It allows us to develop the webpage rapidly. It is also known as RAD (Rapid Application Developer).
- It allows us to separate from formatting develop page to the presentation of webpage.
- It allows us to create well designed websites.

## **Limitations of CSS**

- Using CSS we can perform static styles for the webpages.
- In order to create dynamic styling for the websites, we must make use of scripting language such as JavaScript and libraries of JavaScript.

## **Types of CSS**

1. Inline CSS
2. Internal CSS
3. External CSS
4. Default Browser CSS

### **Inline CSS**

Defining all the CSS properties within the style attribute inside the opening of the tag is referred to as Inline CSS.

### **Internal CSS**

Defining all the CSS properties within <style> inside the HTML document is referred to as Internal CSS.

### **External CSS**

Defining all the CSS properties within as external Script or File with an extension CSS is referred to as External CSS.

- In order to link external CSS file within the HTML document we must use of <link> .
- The value for the “ref” attribute should be ‘stylesheet’.

# PROJECT – CODE IMPLEMENTATION

# OUTPUT SCREENSHOTS

**AMRUTA**

**amrutamarga@gmail.com**

**+91-8546967253**

**Bangalore**

**[LinkedIn](#)**

**TECHNICAL SKILLS**

**PROGRAMMING LANGUAGES**

- Java (Pursuing)
- HTML 5
- CSS 3
- R
- Python

**SOFTWARES**

- Canva
- Selenium (Basic)
- Bubble

**LANGUAGES**

- English
- Kannada
- Hindi

**OBJECTIVE**

---

I would like to be a part of the organization where I could use and enhance my knowledge for the development of both the organization and myself. I can learn and grasp new things and give my best for the organization.

**CERTIFICATES**

---

- Data Science & Analytics using Python and R and Certified as an MTA - Knowledge Solutions India Pvt. Ltd.
- Selenium with Python - Great Learning
- Java Full Stack in GQT - Pursuing

**INTERNSHIP**

---

Product Development Intern - Yuvamytr Ed Tech Solutions Pvt Ltd

**ACADEMIC PROJECTS**

---

- Industrial Transactions using C (Mini Project)
- Heart Disease Prediction using Data Science with Knowledge Solutions India
- Inventory Management System (Mini Project)
- Tourist Guide Application (Mini Project)

**CO-CURRICULAR ACTIVITIES**

---

- Presented a technical paper on "A Study on Python and its Libraries" in 3rd National Conference on "Recent Advances in Engineering & Management" (NCRAEM) conducted by AIEMS college.
- Poster design for Blood Donation camp conducted in AIEMS college.

**EDUCATION**
